

Resume: **JULIAN H. STACEY** BSc.Hons. (Computers & Cybernetics)

COMPUTER CONSULTANT: UNIX, NET & SYSTEMS ENGINEERING

(*Lebenslauf auch in Deutsch erhältlich -- Resume also available in German*)

TEL +49 89 26023276 **EMAIL** jhs[AT]berklix.com **WEB** <http://www.berklix.com/~jhs/>

ADDRESSES Munich & Aachen Germany, & Tunbridge Wells, Kent, England

PRE-REQUISITES No Tobacco Smoke (Allergic). No Microsoft. No relocation.

EXPERIENCE 35+ Years Computer Telecom & Electronics Industry:

System Engineering (since 2.75); **Unix** (since 1978), **C Programming** (since 1982),
for Unix & Embedded **real time applications**; Hardware/software interfacing; **Sys. Admin.** (Firewalls, Mail & Web Servers etc); **Porting & development to custom software requirements**; Telecom & Computer system planning and development; Project costing & management.

COMPUTER EXPERIENCE (* T = Target System, H = Host System, C = Combined)

HARDWARE	SOFTWARE	PERIOD	*	COMPANY
Various	Unix, Mainly BSD, See : http://berklix.com	2017 See Web For Recent Years	C	Vector Systems Ltd.
Intel 486	FreeBSD-4.9 & 10 http://berklix.com/scanjet	2003 & 4	T	Motorola, Texas, Denmark.
Intel 686	DNS, HTTP, SMTP: surfacevision, bsdpie, a monorail	2002 on	C

Prime/Telenet	IPSS Net. Ctl. System	3 Mth. 1977	C	BT International
Hasler M110 & M150	Message Switcher	3 Week Courses ~1976	T	BT International
HP Minicomputer	Assembler	2 Week Courses ~1976	T	BT International

LANGUAGES & TOOLS : EXPERIENCE

Preferred:	C, Unix, bsd make, bind/named, apache, cvs/sccs, gdb, bsd kernel config, X-Windows, Groff, Html, Sendmail.mc, M4 etc.
Competent in:	Tcl/Tk, TCP/IP, Apache, BSD-IPFW, Named(Bind/DNS), PLF/PLM/PLZ, Algol, Basic.
Have Used:	C++, CGI Perl, Assemblers: NS32000, M68000, I8086, M6800, Z80, Macros: ML1.
Some Experience:	HP-Mini, I8080, Z8000, and PDP11 Assembler, Ada, Pascal, Fortran, Forth.

UNIVERSITY

Bachelor of Science, Honours Degree 'Computers and Cybernetics', University of Kent at Canterbury, England. Graduated 1980. (+ prior Electrical & Electronic Engineering 1st year pass, Leeds University 1974+6).

WORK EXPERIENCE (newest first, • = Own work, ○ = Group project).

- TECHNICAL DIRECTOR : Vector Systems Ltd** <http://www.berklix.com>. **2001 - 2017**
 • Project budget negotiation, Team recruitment & management, Development & support, Prosecution of debtors, Corporation Tax etc. Confidential. List skills needed, I'll tell you Yes or No & where [else] to ask.
- SCANJET FreeBSD CONVERSIONS for Motorola & others** -
 • NT to FreeBSD conversions : Ref. www.berklix.com/scanjet/
- DEVELOPMENT for Vector Systems, Munich** **2001**
 • Bootable custom CDROM Mastering, FreeBSD 4.[3-5] based.
- Linux & GNU Tools etc for Speech Design, Munich** **2001**
 • Linux [Debian + Suse] + GNU Tools
 • Advice on Software Patents, FSF & BSD code embedding right etc.
- DEVELOPMENT for a customer of Vector Systems, Munich** **2000**
 • Internet planning for new empty site, inc. hardware ISP rack & cable provision, Internal, firewall, & web external FreeBSD-3.4 servers. Implemented 3 server system, extending to 5 server inc. diskless configuration.
- DEVELOPMENT For OCE Printing Systems, Poing** **1998-1999**
 • Development of C, X-Windows & Motif application, Target: Intel 586 + SCO-5.0.5 + Motif then Lesstif, Host: FreeBSD-3.3 + Lesstif-0.89
- DEVELOPMENT For DASA / Deutsche Aerospace, Ottobrunn** **1997.07-1997.12**
 ○Development of interface for Aircraft structural design. TCL/ TK/ Tix, C etc.
- FILE SYSTEM Data Rescue Investigation: Rank Xerox, Berlin** **1997.04**
- DEVELOPMENT For Vector Systems** **1997.02-1997.03**
 • Development/ improvement: ISDN, TCP/IP etc.
- VT220 EMULATION & EDITOR : BLW (Thyssen)** **1996**
- WEB CONFERENCE PAGES: Ditec, Munich** **1996.05**
 • Page preparation: Data Warehousing Europe '96 conference, & RAID '96 conference.
- LECTURER : UNIX SYSTEM ADMIN.: Dekra Akademie, Munich** **1996.03**
 • Lectured for 2 weeks in German, to 17 people with individual PCs. Determined syllabus, inc. System 5 (SVR4), Berkeley (BSD), Linux. Installed FreeBSD. Set & marked own exam.
- WEB CONSULTANT: PRE- LAUNCH SUPPORT: Europe Online, Munich** **1995.12**
 • Pre launch support: Repaired World Wide Web ISMAP control files, & HTML links etc.
- WEB TOOLS & CONFIGURATION: Siemens, Nuremberg** **1995**
 • Corrected web server configuration, wrote World Wide Web CGI test scripts, obtained Oracle database interface tools, assessed CGI/ forms scripting macro tools.
- CONSULTANCY (ANALYSIS): Customer of Vector Systems, Munich** **1995**
 • Consolidation of inter- operability of networking components for future product. 1995
 • Prepared infrastructure for an Internet Web press presentation. 1995
 Planned cheap Internet server to save a customer considerable money.
- X11R6 X-WINDOW SYSTEM PORTING: Munich Tech. Univ., CAD Dept.** **1994-1995**
 • Installation & support of X-Windows X11R6pl11, for DEC Alpha Computers 1994
 • Porting various support programs such as CMU/Sup to Sequent. 1994
- DEVELOPMENT SYSTEM EXPANSION: Vector Systems** **1993-1994**
 • Support of large FreeBSD system. Contribution to source of FreeBSD project 1993-1994
 • Development of gateway NetBSD system. Contribution to source of NetBSD project. 1994
 • Various minor kernel modifications, (such as memory resizing, default parities etc) 1993-1994
 • Porting various support programs such as CMU/Sup to PCS-Cadmus. 1993-1994
 • Porting Eprom burner driver to FreeBSD (Unix) (incomplete). 1994
- RUSSIAN X11 TOOLS DEVELOPMENT: Siemens, EWSD Hofmann Strasse** **1992-1993**
 • Development & Implementation of a 3 language Cyrillic/ German/ English screen/ Keyboard/ Laser printer combination with X-Windows, for SCO,(& also Unix SVR4 & BSD). Inclusive of BDF to HP PCL5 Font converter tool, Cyrillic & custom font manufacture.
- DEVELOPMENT For Vector Systems** **1991.01-1991.06**
 • Building of a PC532 (25MHz NSC 32532 CPU, 32381 FPU, 32202 ICU, NetBSD (+ Minix 1.3/5 + Mach), 8 TTY, 8M 70nS RAM, SCSI 300M Disk). Development/ improvement: GCC, Gh/ Postscript, & other FSF tools, Modem connection, SLIP TCP/IP + uucp/ email + slip, Nroff driver for HP3P laser etc.
- REVERSE MACRO DEVELOPMENT Siemens, EWSD Hofmann Strasse, Munich** **1990.01-1990.10**
 • Customer specific data conversion (reverse macro) tool.
- DEVELOPMENT FOR Vector Systems** **1989.02-1989.12**
 • Unix/ Msdos Directory/ tree transfer coms. prog. in C. skips unchanged files, maintains timestamps, supports inter computer pipes.
 • Rescue tool for physically damaged floppy discs (written in C for Msdos and Unix).
- REAL TIME CONSULTANT: Rohde and Schwarz, Munich** **1988.02-1988.11**

Wrote self test software for 15 GHz microwave sweep generator/ sawtooth oscillator & analyser. Developed self test software working across 2 80286 processors via a VRTX real time kernel, using Microsoft C Version 4, Hitex ICE Emulator, Eprom'able code. Programmable adjustment of tunable filters & YIG/ YAG components to minimal/ maximal power consumption tests. Control & compensation of analogue/ digital interfaces. Run time evaluation of impedance networks using Kirchoff's laws. Model names SWM & ZAM. 1 Year project.

COMS. PACKAGE DEVELOPMENT: Siemens, EWSD Munich Hofmann Strasse 1986.09-1987.10

- Designed and implemented an overlay package to add task interleaving and multiple priority facilities to existing VAX Unix V7 'FTSinix' to BS2000 (IBM) file transfer program. Implemented with German functionality, and documentation.
- Ported package above to also run on a PDP 11/70 running Unix Version 6, with RJE (Remote Job Entry).
- Development study for control system for telephone exchange development documentation dept.

CONSULTANT: Siemens Perlach Munich, Sinix Devlp. Dept. 1985.07-1986.06

- **Production & automation of Unix** Sinix Software for 8 European languages & 2 CPU families (NSC-32x32 & I-80x86): developed & documented tools; cooperated with source code control personnel; produced earliest languages; trained personnel, guided & supervised personnel for later language production.
- Developed parallel multiple language simultaneous compilation capability.
- Top Makefile written to compile Sinix & all packages in 1 language. Shell to produce 7 sequential multiple language versions of Sinix through a weekend.
- C compiler & Yacc improved, to select correct language library.
- Wrote Makefiles for libraries, delivery tree production, etc.
- Improved & extended countless existing Makefiles.
- Produced a standard Siemens style product floppy, to convert a Sinix system to a Sinix production/(compilation) system.
- Wrote program to check & duplicate product floppies.
- Specified & supervised a production support program. (A Zilog style `upkeep`).
- Made floppy production tools faster & network independent.
- Production logins secured.
- Documentation of automation work and recommendations for future work.

ASSISTANT EXECUTIVE ENGINEER, British Telecom International, London, England 1980.07-1985.06

- **Unix System Administrator** + Computer Centre & Network Support: Assessed, purchased & installed hardware & software packages, Established automatic system integrity and user data security package & procedures. Optimised system configurations (disk layouts & networks). Provided user technical support. Managed Ethernet + associated peripherals + technicians. Installed operating system & package upgrades. Interfaced computer systems and peripherals. Supervised student projects.
- Manned BT International Exchange during service crisis. (Using PTT 3.4 KHz * 12 * 5 * 13~15 Frequency modulation system, including upper/ lower sideband, pilot levels, carrier regeneration etc).
- Installed Unix C to Z80 Cross Compiler, developed stack frame compatible IO routines, + down loader for target Z80. Beta testing of replacement compiler. Developed base for a table controlled terminal emulator.
- Unix Administrator: developed system, trained colleagues & successor.
- Specified 70 Screen 2 Gbyte high reliability database.
- Designed and implemented hardware and software for a Z80 SIO device driver on a Mostek micro development system (in Z80 Assembler for MK3884-7).
- Automated calculation of (a) noise, and (b) pulse voltages, induced in telecommunications lines from adjacent (a) electricity power supply grid during short circuit surges, and (b) railway lines with train power pickup conductors sparking; to evaluate EMI, with respect to (a) requirements for gas discharge tubes for human protection, (b) noise induced affecting signal/ noise ratio. (Program written in Algol).

UNIVERSITY PROJECTS Canterbury, Kent, England 1977.10-1980.06

- Designed, built & tested plotter/ printer mechanics, power electronics, & software (in PLF, like PL/M).
- Implemented parallel & serial port interrupt components for a floppy disk file system (in PLF for M-6800).
- Developed multi input data logging micro system (in PLF for M-6800).
- Wrote multiple function plotting program, with automatic floating point self scaler and offset (in Basic).

ASSISTANT EXECUTIVE ENGINEER, British Telecom International, London, England 1975.02-1977.09

- International Packet Switching System: profitability costing, systems planning, installation, configuration, testing, linking to American Telenet System. 'Prime' computer hardware.
- Time Multiplexed 50 Kbit/s Satellite Link: Experimental viability testing of Canadian Link, Cascaded multiplexers ({ 50 Kbit/s > 24 * 2.4 Kbit/s } + { 2.4 Kbit/s > 50, 100, 110, 200 & 300 bit/s }). Testing experimental FIFO buffer to compensate for varying satellite propagation loop delay (due to both shorter term atmospheric perturbations & longer term satellite path drift).
- Testing of experimental 50Kbit/s time multiplexed satellite connection to Italy. via COMSAT SPADE. (COMSAT = **C**ommunications **S**atellite Corporation, USA; SPADE = **S**ingle channel per carrier, **P**ulse code modulated, multiple **A**ccess, **D**emand assigned, **E**quipment).
- Implementation planning 4.8 Kbit/s commercial time multiplexed service to Canada.
- Designed & produced extra PCBs for Hasler M150 telegraph message switcher.
- Costed and designed a telegraph speed and code converter. 5/7 Unit, 50/2400 baud etc.

TEST TECHNICIAN, Time Electronics & Feedback Instruments, Kent, England 1974.08-1975.01

- Oxygen analyser and extremely high precision voltmeter.

VARIOUS OTHER COMPUTER EXPERIENCE

- Lecturer for Faraday (Electrical & Electronic Engineers) e.V. www.berklix.com/free/talk/ 2007 & 2013
- Organiser SFD Software Freedom Day www.berklix.org/sfd/ 2010 & 2011
- Exhibitor of BSD Systems @ Vintage Computer Fest Europe (www.vcfe.org). 2000-2005 etc
- Supported Munich Council's dumping Microsoft for Linux www.berklix.com/~jhs/stadtmuenchen/ 2003
- Stand Organiser for BSD- Unix @ Linux Park, Systems Exhibition 2001
- Co Founder of BIM (www.berklix.org/bim/) & MECC (www.berklix.org/mecc/) 1999 on
- BIM= Berkeley In Munich MECC= Munich Electronic & Computer Consultants
- System Administrator for BIM: Berkeley in Munich (www.berklix.org/bim/) 1999 on
- Code contributor to FreeBSD (www.berklix.com/~jhs/src/) 1994 on
- Src/ diffs + ports/ Hylafax, Exmh, Estatic ports wrappers etc.
- Member of the XFree86-3.0D beta test team. 1994
- Ported: Minix 1.2 to Toshiba T1100+, modified: driver for higher density Floppies. ~1989
- Wrote Unix style overlay for Msdos. ~1986-90
- Started English Firm, recruited & managed other programmers. " 1986 on
- Prepared business plan to found a company in UK designing Unix computers. ~1984
- Designed and built hardware & software for an NSC 32016 16/32 bit system ~1983

NATIONALITY **British** (& both parents); Security cleared by Royal Air Force Volunteer Reserve & British Telecom)

SECURITY I've never been near political or religious extremism; I abhor drugs & never touched them; No police record. Alcohol only in moderation, Never any driving & not till after work. No epileptic or similar machine control risk liability. Not colour blind (eg re. wiring & resistor codes & reaction buttons).

PERSONALITY

I enjoy computer development (soft & hardware), & participate in public source projects, eg www.freebsd.org etc. I do not touch Microsoft or games. Organiser for various groups www.berklix.org Berklix (& Ex GEA: German English Association) Beer Gardeners weekly, wind surfing, ski, bike & hiking trips, barbecues, firework displays, elections, web & mail lists. Support democracy, (I ran & enforced clean elections for UKC/SU & GEA; urged elections for FreeBSD core (later accepted); complained to British Consul re. 2009 Munich mass EU election registration failure, & promoted registration for 2014 election).

NON- SMOKER

I require smoke free offices. I declined to renew a contract in a smoked office.

LANGUAGES

Native English, Fluent German (I happily negotiate & win legal contract terms, but my grammar is poor, esp. written) . I can read French (but rusty), I understand a reasonable amount of French if spoken slowly & clearly.

CAR DRIVER

Estate Car (Station Wagon) in Munich, German licence issued , UK licence issued 1974

PERMITS

Unlimited German residence permit. Registered at Munich tax office.

OWN RESOURCES

Equipped to work in my office, your office, & remote via Internet :

- **Internet Connectivity:** DSL 16Mb/s flat rate connection. 2 Firewall Gateways, Multiple mirrored permanently connected (24/7) Internet servers at 2 remote sites. 5+ domains.
- **Computers: approx.20+ Unix Systems inc. : FreeBSD & Ex NetBSD:** NSC 32532; **2 UPSs** (Uninterruptible Power Supply) secure power for gateways, internal servers, fallback PBX, fax etc. 2 PBXs, multiple switches/hubs (fallback reserve).
- **Test Gear:** Logic Analyser, Oscilloscope, DVMs, Eeprom eraser & programmer.

STANDARD & PROPRIETARY SOFTWARE PACKAGES AVAILABLE

My own bootable encrypted USB stick, (& prior CDROM)self mastered with FreeBSD (www.freebsd.org), is available to embed customer products on, with X-Windows, and any of 24064 (@ 2014-10-02) BSD, & other packages available, plus customisation, compilation, installation, configuration, & support. DSL + ISDN Auto answer+ dial- on- demand+ timeout, & Firewall, Web HTTP, FTP, SMTP via UUCP, PPP, IMAP, Popmail, Email to fax servers. Custom packages: Cyrillic/ Chinese/ German/ English X-Windows + keyboard + printer environment; Screen & printer BDF/ PCL font conversion tools etc **Sources:** BSD automatically updated via net. CVS).

PRODUCTS & DEVELOPMENTS: Web, Internet, X-Windows, Unix Servers.

In addition to Internet Unix & FreeBSD X-Windows, Firewall, Server & Workstation systems; Support, custom development and tools for various other systems is also available.

TYPESETTING of this resume)

This resume was prepared using a self developed WYSIWYG mechanism (vi make groff ghostview, + automatic Sigusr1 signal) plus an English/ German language filter, + Groff, & Ghostview (Postscript previewer) using X-Windows & FreeBSD (Unix) Optimal Format: A4 paper with Postscript, PCL or BJC. Ascii Format OK, HTML format poor (back end tool). (The WYSIWYG mechanism is also available for Chimera (a web browser), & Xfig (a figure generator), & is extensible.

NEWEST VERSION <http://www.berklix.com/~jhs/cv/> + Company projects <http://www.berklix.com>

In English & German. : PDF, Postscript, Plain Text, HTML, (No MS Word, monopolist proprietary non standard).

See Pages 5 & 6 for Annexes:

Limited Driver & Kernel Exposure + Management & Organisational Experience + Agents & Recruiters Notes

Page 5 : Limited Driver & Kernel Exposure

(Beyond { Unix since 1978 + C since ~'81 + BSD since UCB 4.2 + FreeBSD patchset contributor before FreeBSD adopted versions numbers, eg inc. 386BSD) })

- 6800 parallel port relay & stepper motor control, designed developed built tested & documented hardware & software.
- Wrote Z80 embedded sio driver (interrupt with watchdog polling);
- Hardware & software design & build of an NSC 32016 prototype microcomputer inc. monitor in C + hand assembly of test loop, tested with logic analyser; (followed by work toward building a product & company).
- Read parts of Lions' book & bits of code on Version 6 Unix (Around '82). https://en.wikipedia.org/wiki/Lions%27_Commentary_on_UNIX_6th_Edition,_with_Source_C
- Enhanced Minix floppy driver to double the capacity;
- Searched for tape driver bug on Symmetric 375 (BSD 4.2) (but linkable kernel modules had other bugs, so wrote recovery program instead).
- Run time init for VRTX RTOS devices,
- Looked in FreeBSD kernel re 16M bounce buffers & cache etc.
- Rolled custom kernel FreeBSD configs for decades,
- Looked for clues to failure & chipsets etc in FreeBSD drivers (last urtwn, re. heat, still pending).
- 3 of Addison Wesley series "Design & Implemetation of *BSD.." on the shelf.
- Nothing big yet, always something else more urgent to fix or develop, but interested to do more.

Page 5 : Management & Organisational Experience

- Liason operational & projects departments & suppliers, BTI london.
- Chaired Student Union Elections Committee: Managed election of ~2,500. chaired unruly meeting of many hundreds, after previous 2 chairs no confidenced.
- Business plan & Venture Capital seeking, Canterbury (NSC 32016).
- Team of 2: assessing & specifying 1 million pound database (1983 prices).
- Responsible for DP esp. Unix services to 30 developers, BTI London.
- Managing 2 technicians for BTI, London.
- Supervision of student project, BTI, London.
- Responsible for Siemens 7 language 2 CPU architecture production.
- Created Vector Systems Ltd, sought & found work for associates.
- Organised countless ski trips for up to 38 people in 13 cars.
- Recruited & installed programmer for VSL on 3 Siemens developments.
- Recruited & flew over kernel programmer to present to Siemens.
- Landlord of 2 UK rental properties ... tenant relationships.
- Sys. eng. requirments: design, budget, lethal floor loading alert.
- Lecturing in German (& controlling some !) & examining for Dekra.
- Leader for elections & firework launch teams of sports & social club.
- Organised organisers of ski trips & beer garden trips.
- Created & run many mail lists on <http://berklix.org>
- Host other peoples domains & lists on berklix servers.
- Created & organised <http://berklix.org/bim/> & <http://berklix.org/mecc/>
- Organised BIM exhibition manning for Elektronik Boerse & Systems Expo.
- Team assembly, management, & use of lawyer to sue debtor.
- Recruited team of speakers for <http://berklix.com/free/talk/>
- Management of Vector Systems Ltd, UK, inc. company tax etc.

Page 6 : AGENTS & RECRUITERS:

Consultancy Rates Are Negotiated In Euros Per Hour For Work in Munich area, Germany Offices (mine or client's) Outside Munich commuter area, extra costs are charged:

Please do Not mislead your client or yourself by just multiply hourly rate by 8 hours/day & GBP/EUR to get some false Pounds Per Day rate !

Hourly rates in Euro or Sterling on enquiry. Currency Rates at <http://www.berklix.com/~jhs/rates/>

Consultancy Cost Component Examples For London or Berlin etc:

- + Consultancy On Site At Client, eg in London or Berlin:
Initial week(s) on site, as determined by client & consultant (not agent) discussing technically, then periodically on site at client during project, at an hourly rate somewhat more than the Munich office rate. Typically no more than 32 Hours per week of work (Mon AM & Fri PM typically travelling).
- + Travel Time between Consultant City & Client City:
Payable by client at half the hourly working rate.
(Neither client nor contractor willing to pay all wasted time.)
- + Air Flight Costs
Business rates as clients schedules preclude finding tourist rates. Minimum weekly flights, or for days clients require visits. Trains usually less practical. Choice of planes or trains is at Consultant discretion, Not client or agent.
- + Remote Consultancy From Munich Office:
Once consultant understands technical requirements of client, consultant reduces working presence in London/ Berlin to part time, doing most development in Munich office, at a somewhat cheaper rate with no expenses, & as no travel, more work done, typically 40 hours per week.
- + Transport Costs In Client City
Airport/ hotel/ client office taxi/ train as appropriate. (Agent to offer estimate of what consultant needs to charge, as agents often keep client locations secret, & only agents know geography between airport, client & hotels & London & Berlin conurbations are huge.)
- + Hotel Costs:
Business rates, clients schedules preclude tourist rates. Agents alone know client location, what other local events may affect hotel occupancy & transport, all unknown to consultant (eg Munich Oktoberfest & Hanover Computer Fair occasionally book out all hotels for 100+ Km radius). If agents don't know their own city, they should find an estimate eg here <http://www.booking.com> (unlike most, bookings often flexible): No flat rental as project & rental termination/renewal dates mis-match, & it takes months to find a flat, & consultant should be working, not wasting time.
- + Foreign City Nightly Allowance:
Cost of a cheap pizza alone does Not compensate business trips in foreign cities, alone & bored, meal followed by drink at pub or finding a cinema etc + transport. All major employers financially compensate employees who have to travel, above the price of hotel + meal, & I require commensurate compensation.

Contracts:

- + I'm a professional, contracting & negotiating 30 years since 1985. I'm fully aware of agent ploys that delay & deter business agreement, so don't try, it wastes mutual time & reduces trust.
- + Contract Terms
Contracts must be balanced to satisfy both sides, or are Not signed. I do reject contracts with un-balanced terms. Client's & agents's requirements & contract terms do Not out rank consultant's. If you offer contract terms, they are treated as first draft for negotiation, If I offer you contract terms, treat them similarly. It encourages both sides to offer reasonable terms for quick acceptance, not adventurous one sided terms. (Managers often don't realise when they foolishly let their lawyer provide a first draft to a contract, the lawyer often seeks to prove lawyer's worth, by over- securing employer's interest too much at the expense of the other party, delaying business when other party to the contract rejects unbalanced terms.)
